The Evolution of AV-over-IP: DM<sup>®</sup> Technology The Next Generation  
Instructor: Kyle Marles

# DM NVX™ technology products

DM-NVX-350(C)

May 2017

- 2 HDMI® in, 1 HDMI® out
- Analog audio in/out
- Bi-directional USB 2.0
- RS-232, IR and CEC
- Operates either as TX or RX
- Box and card form factors

DM-NVX-351(C)

May 2017

- Same I/O as DM-NVX-350
- DSP for down-mixing audio to blend multi-channel and 2-channel outputs
- Dolby®, Dolby TrueHD, DTS®, DTS Master-HD, PCM formats

DMF-CI-8

May 2017

- Rackmount cage to hold DM NVX™ endpoint cards
- Highest density form factor – 8 cards in 2RU
- Provides AC power and LCD for troubleshooting

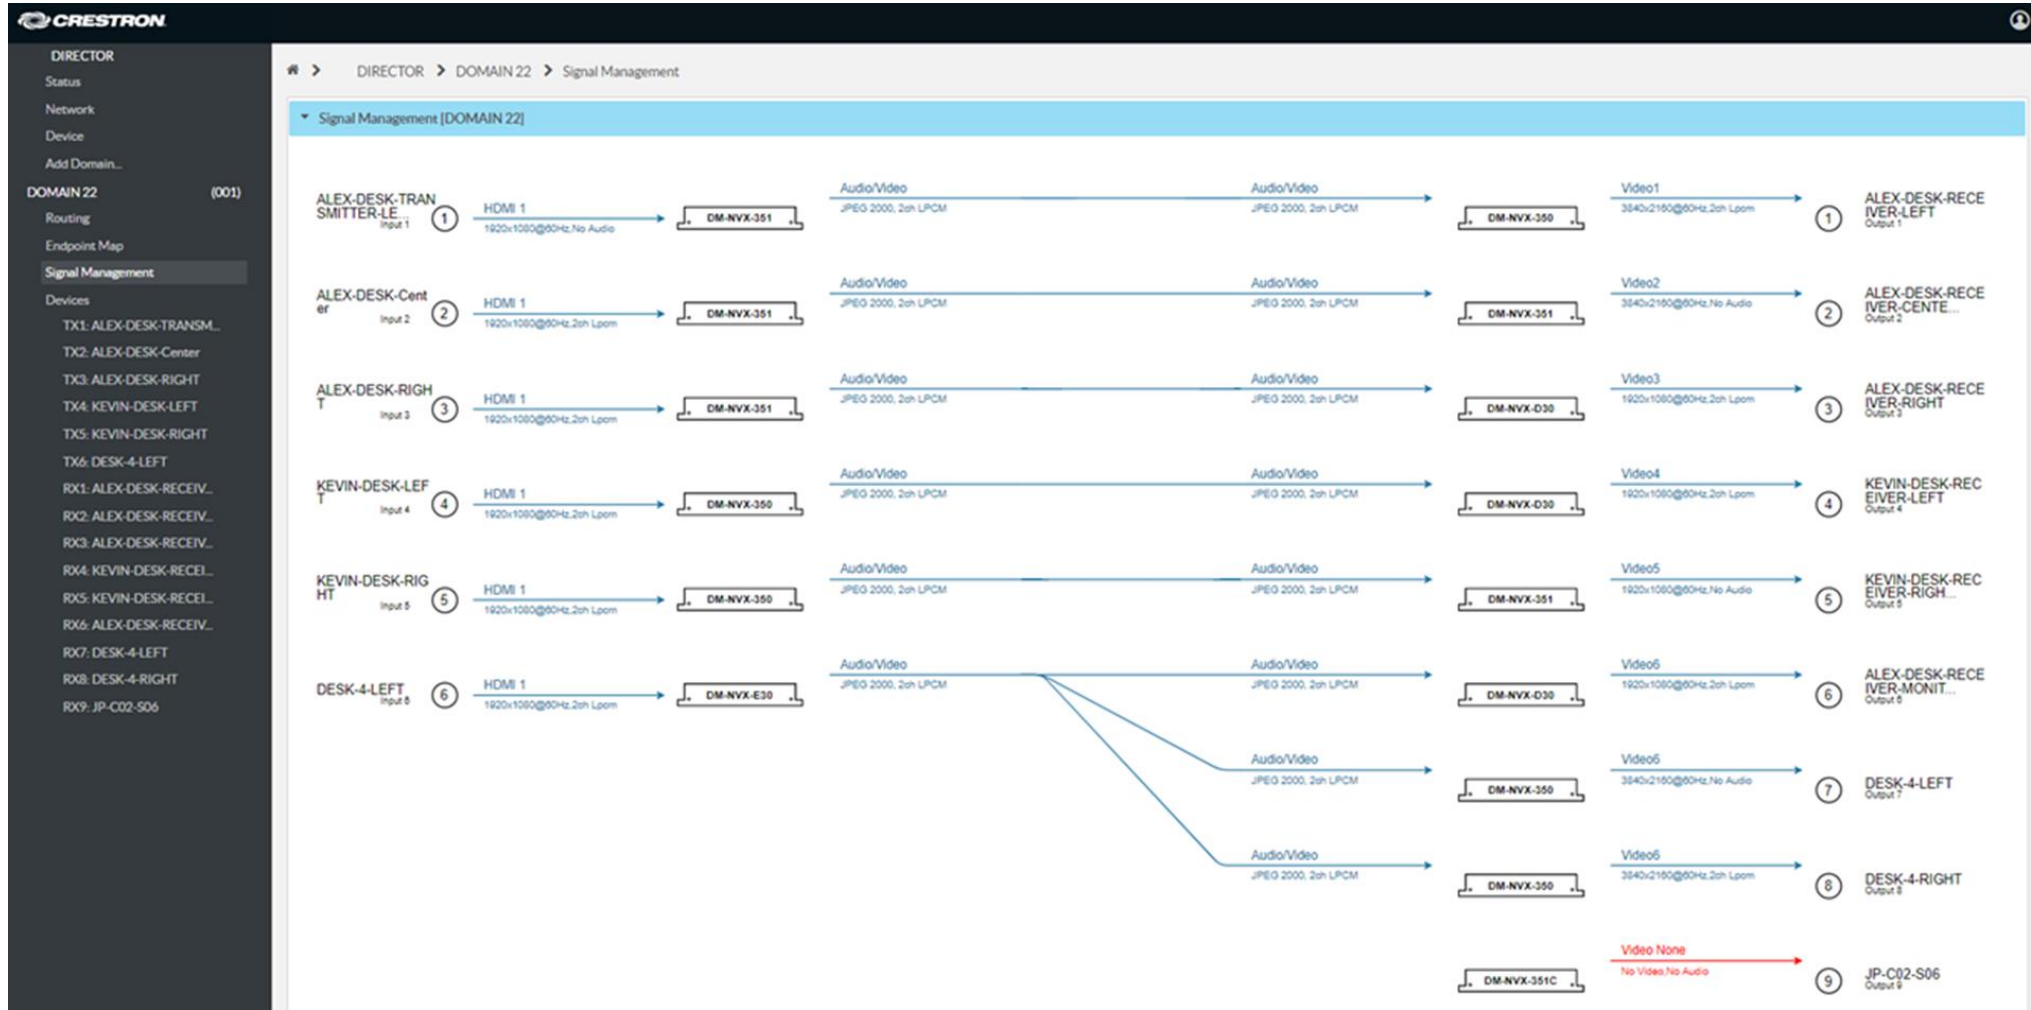

DM NVX Director™

January 2018

- Master controller for DM NVX™ technology systems
- Provides central control, management, monitoring point
- Available in 80, 160 and 1,000 endpoint versions

# DM NVX Director™ Virtual Switching Appliance

---

# DM NVX™ technology over the last 18 months

---

To date Crestron has sold over 120,000 DM NVX™ endpoints since it started shipping in September 2017

More than 5,000 engineers/technicians from our industry have attended Crestron DM NVX™ technology training

DM NVX™ technology is the culmination of 10 years of industry leading DigitalMedia™ technology engineering, development, and experience

---

---

# DM NVX™ Technology Next Generation

---

## **New Pixel Perfect Processing Technology Even Better Performance**

Quality

Latency

## **Free firmware upgrade for existing units**

You must upgrade all end points to the current release firmware to ensure compatibility between them.

# Pixel Perfect Processing

# YES.

---

DM NVX™ Technology, The 1Gb Network AV Solution that works with any network, any application, any design.

**Any network, any ask.** DM NVX™ technology says yes.

Every network, every device, every format, every type of content, every type of room.  
And every picture Pixel Perfect. **DM NVX™ technology says yes, yes and yes.**

---

# Every Picture Perfect. Every time. Yes.

---

## The only Network AV solution that delivers flawless video and Pixel Perfect images.

- Pixel Perfect Processing only available with DM NVX™ endpoints, developed in conjunction with Intel and intoPIX
  - Developed over 18 months
  - Builds on the fundamentals and efficiencies of JPEG 2000
  - Adds to DM NVX™ technology reputation for flawless video
- Delivers the same quality as a direct HDMI® source
- Imperceptibly perfect, see the finest detail in the most dense image

See the finest detail in the densest image

First gen image - JPEG2000

New Image - Pixel Perfect Processing

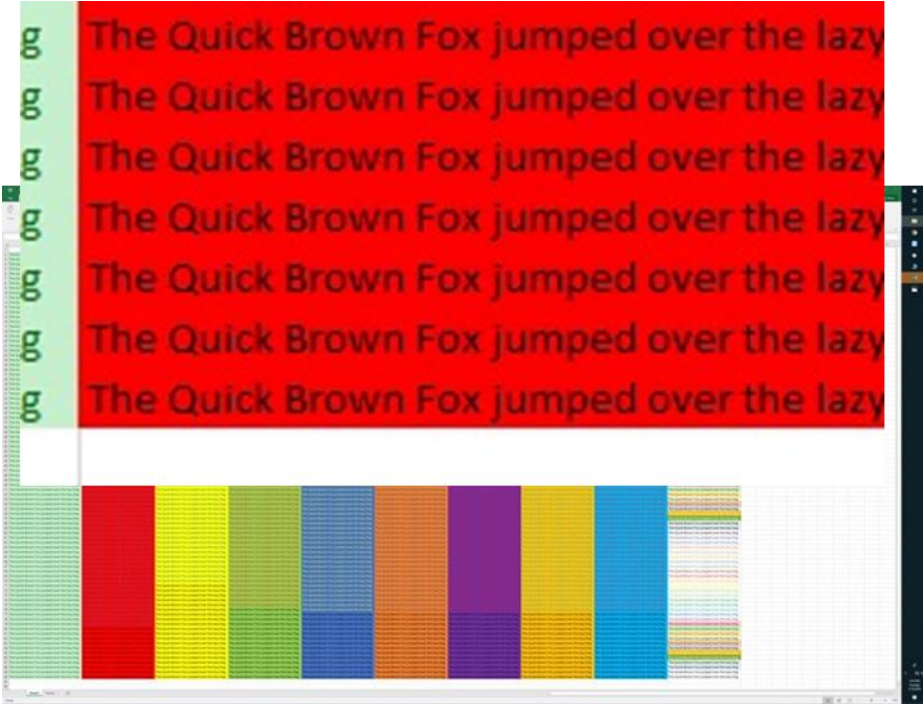

# See the finest detail in the densest image

## First gen image - JPEG2000

## New Image - Pixel Perfect Processing

---

Every movement in real time. Yes.

---

**Experience imperceptibly responsive technology**

**Meets Human Interface Device standard**

- Ensures synchronized camera and audio
- Mouse and keyboard move with you

**Feels like an extension of you**

**Works in real time with real people**

# Test The Latency

If you don't believe me about the even lower latency, go try out gaming via DM NVX™ technology downstairs on the stand

---

# What is Pixel Perfect Processing Technology?

---

**A new technology exclusive to Crestron Electronics Powered by intoPIX**

**Optimized for:**

Natural and computer screen content

Low latency

Low power

# DM NVX™ Technology, Product Line Updates

# DM NVX™ endpoint and Dante® Audio Networking

**DM-NVX-352 adds Dante® audio to DM NVX™ technology**

**Any DM NVX™ endpoint audio input stream can be sent out over the Dante® network**

**Audio from the Dante® network can be embedded in HDMI® and sent to the analog outputs**

**Supports AES67 as well**

---

Every option. Every need met. Yes.

---

**Ecosystem of products work as one**  
**Choose the features you need without**  
**sacrificing performance or interoperability**  
**Everything you need, nothing you don't**

# All products interoperable

---

Every format. Every type of content. YES.

---

Any professional network

Any type of content

Multilayer technology combines signals onto one platform

Greater flexibility

Highly scalable

# Every format. Every type of content. YES.

## Video

- Routing – any signal on the network to any endpoint
- Formats
  - 480i            720p
  - 1080i          1080p
  - 4K 4:2:0        4K 4:4:4
  - 4K w/ HDR
- Inputs – HDMI® or Network Video Stream
- Outputs – HDMI® or Network Video Stream
- Video Wall Processing – supports 8x8

# Every format. Every type of content. YES.

## Audio

- Routing – any signal on the network to any endpoint or combine audio and video from different sources
- Formats – Digital HDMI® and Stereo 2-channel
  - Dolby Digital®                      Dolby Digital EX
  - Dolby Digital Plus                  Dolby® TrueHD
  - Dolby Atmos®                        DTS®
  - DTS-ES                                DTS 96/24
  - DTS-HD High Res Audio™        DTS-HD Master
  - LPCM up to 8 channels
- Downmixing – 351 includes a DSP
- Dante® & AES-67 Audio – 352 supports

# Every format. Every type of content. YES.

## USB

- Routing – any signal on the network to any endpoint
- Interfaces – Full USB 2.0 support
  - Mouse                      Keyboards
  - Cameras                    ID readers
  - PCs                            Printers
  - Thumb drives              hard drives
  - video game controllers
- Bi-directional – Route in either direction, regardless of if the unit is in Transmitter or Receiver mode.

# Every format. Every type of content. YES.

## Control

- IP – Second RJ45 port provides control signals to a local devices
- IR & RS-232 – device acts as a gateway for control of common displays and other devices
- CEC – Built in CEC allows for display control via HDMI®

---

A single, simple, management system. Yes.

---

**DM NVX Director™ virtual switching appliance is mission control**

**Configure, monitor and manage every DM NVX™ endpoint network wide**

**Real time signal routing and control**

**Edge Routing and Distribution**

---

Deploy. Manage. Monitor. Evolve. Yes.

---

**Reduce installation time by up to 90%**

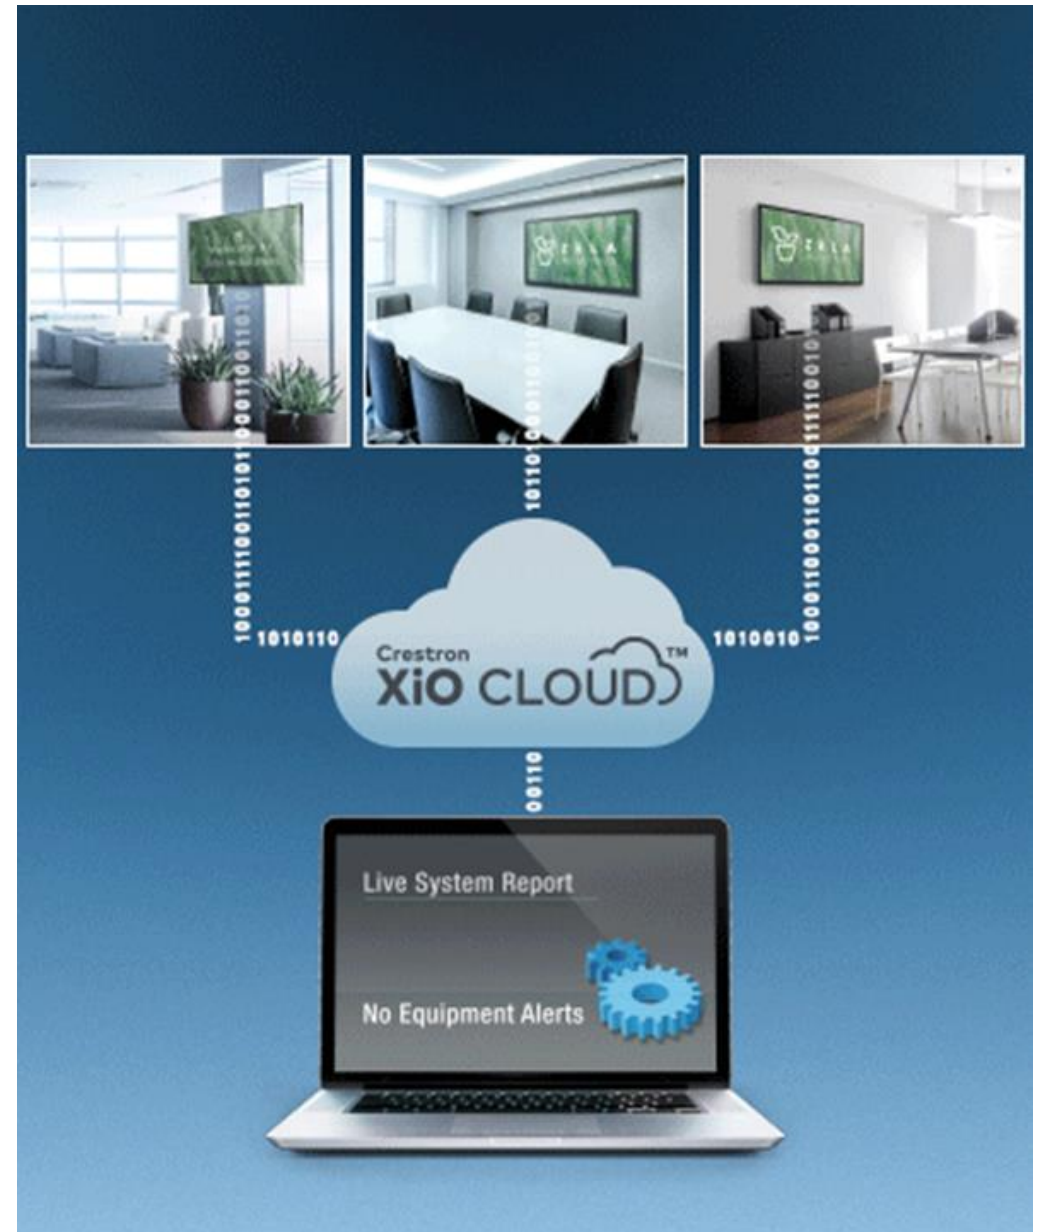

**Configure up to thousands of devices in the same time it takes to configure one**

**Resolve events remotely to improve device uptime**

**Gather actionable usage data to optimize people, space, and technology, with no programming**

**Perfect for upgrading all the existing DM NVX™ endpoints in on click, no need to visit site to deploy the pixel perfect firmware!**

---

---

Every Network. Yes.

---

**Works with 1Gb networks on Cat5E cable**

**Partners with best in breed technology**

Microsoft IoT Partner of the Year

Intel

IntoPIX

**All built to the strictest guidelines to ensure  
the greatest security**

---

# Every Network. Yes.

---

## Network Standards

- Network flexibility
  - DM NVX™ technology is the 1 gigabit solution that works with any network, any application, any design
- Layer 3 Compatibility
  - DM NVX™ technology is capable of transporting data to different sub networks
- Constant Bit Rate (CBR)
  - Constant bit rate provides a predictable environment without surprises. A simple design process makes DM NVX™ technology more reliable in the long-term, helping to avoid outages in the future.

---

# Every Network. Yes. Secured. Yes.

---

**AES Encryption ensures secure audio and video transmission**

**802.1x Authentication ensures that every device on the network is explicitly authorized**

**Active Directory<sup>®</sup> centralized credential management**

**PKI Authentication authenticates specific devices and enables secure key exchanges**

**SSH Network Protocol encrypts and protects command line communications**

---

# Every Network. Yes. Secured. Yes.

---

**HTTPS** – encrypts the data sent between your web browser and the DM NVX™ endpoint web configuration interface

**Secure CIP** – Ensures secured communications between Crestron control systems and DM NVX™ endpoints

**SFTP** – Secure File transfer protocol

**TLS** – end-to-end communications security over networks

DM NVX™ endpoint 352

# Feature Summary

## Transmitter Mode:

Dante® or AES67 audio embedding and de-embedding

2x1 HDMI® Switch

2 Port Ethernet Switch

- 1 Copper UPoE Port
- 1 SFP Port (Any SFP Module can be used)

Analog I/O

USB 2.0 Support

# Feature Summary

## Receiver Mode:

Dante® or AES67 audio embedding and de-embedding

3x1 HDMI Switch

2 Port Ethernet Switch

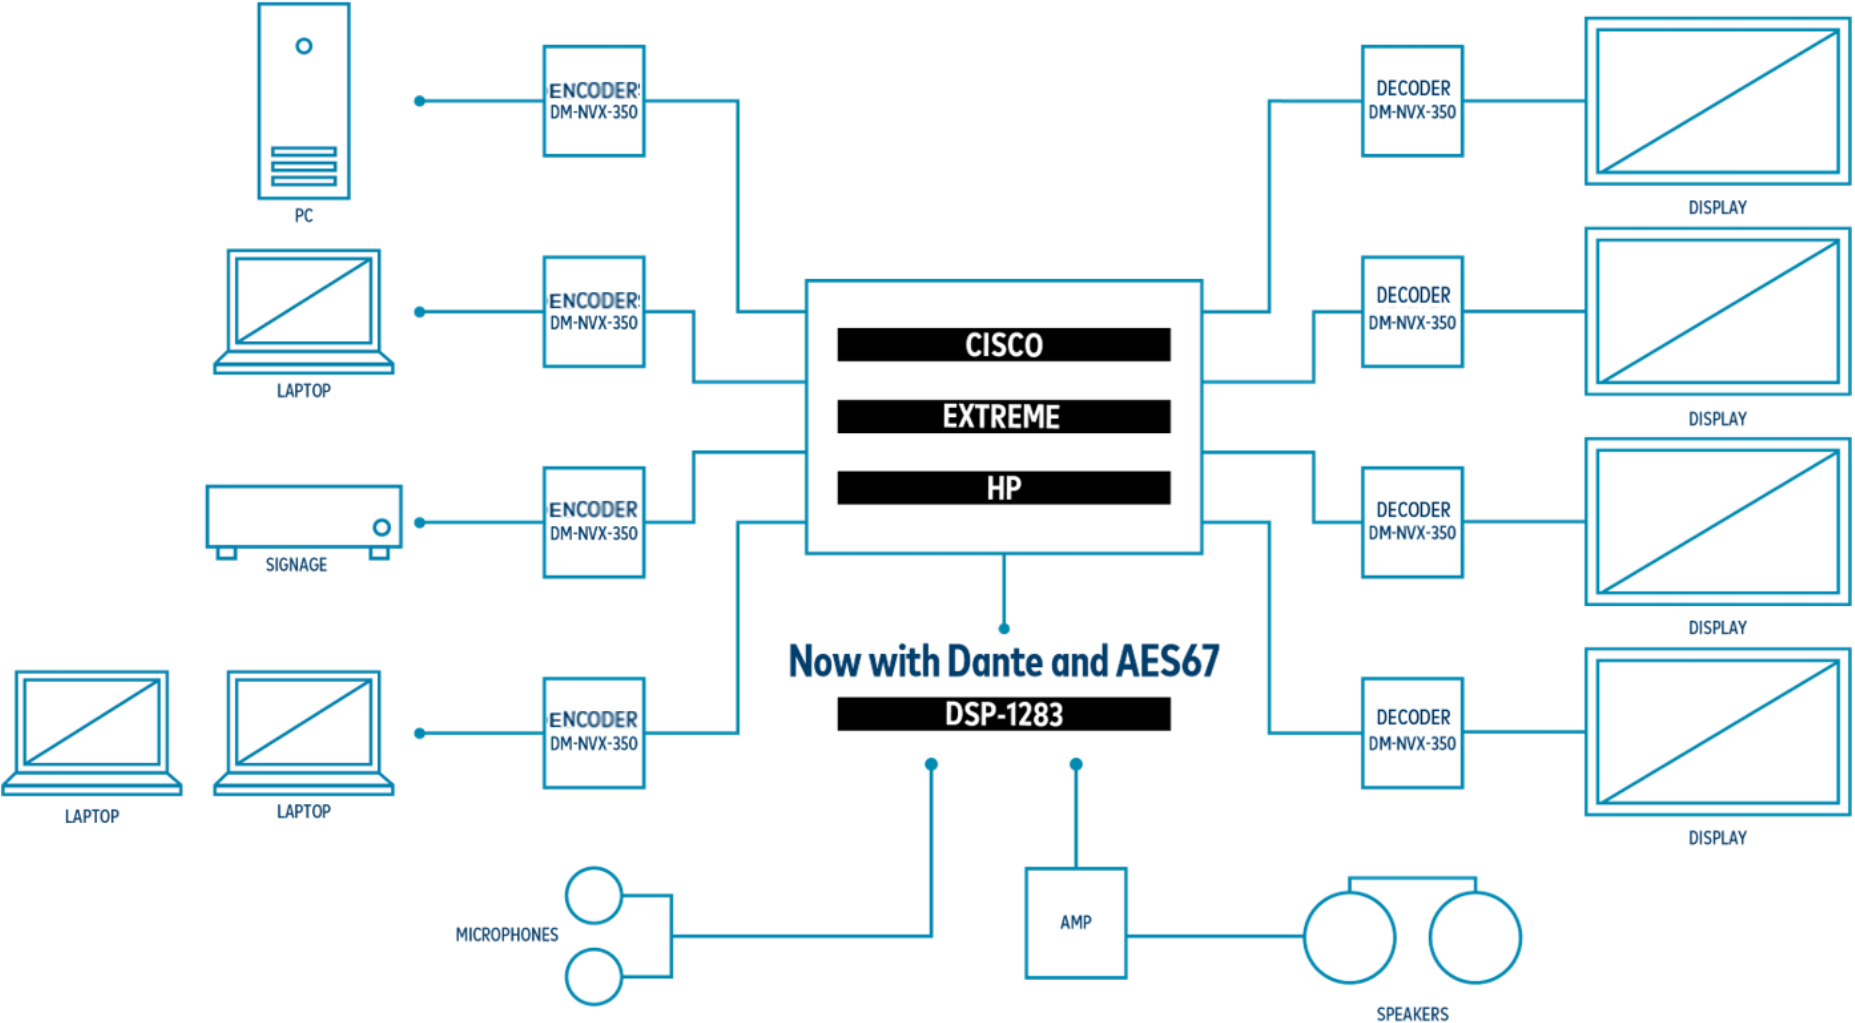

- 1 Copper UPoE Port
- 1 SFP Port (Any SFP Module can be used)

Analog I/O

USB 2.0 Support

## Set through DM NVX™ endpoint Web Page

### Default – Same as DM NVX™ endpoint Device Name

- Model name + DM NVX™ endpoint last 6 mac + Dante® last 6 mac
- ### 2 Mac Addresses from through 1 Port

▼ Stream

Mode	Receiver
Stream Location	rtsp://192.168.1.183:55
Device Name	DM-NVX-352C-00107F
Dante/Aes-67 Name	DM-NVX-352C-9c1761f
Multicast Address	239.9.0.40
Status	Stream started
Resolution	1920x1080@30Hz

# Dante Control Summary

## Dante® controller to:

- Route
- Control
- Configure
- Upgrade Dante Firmware

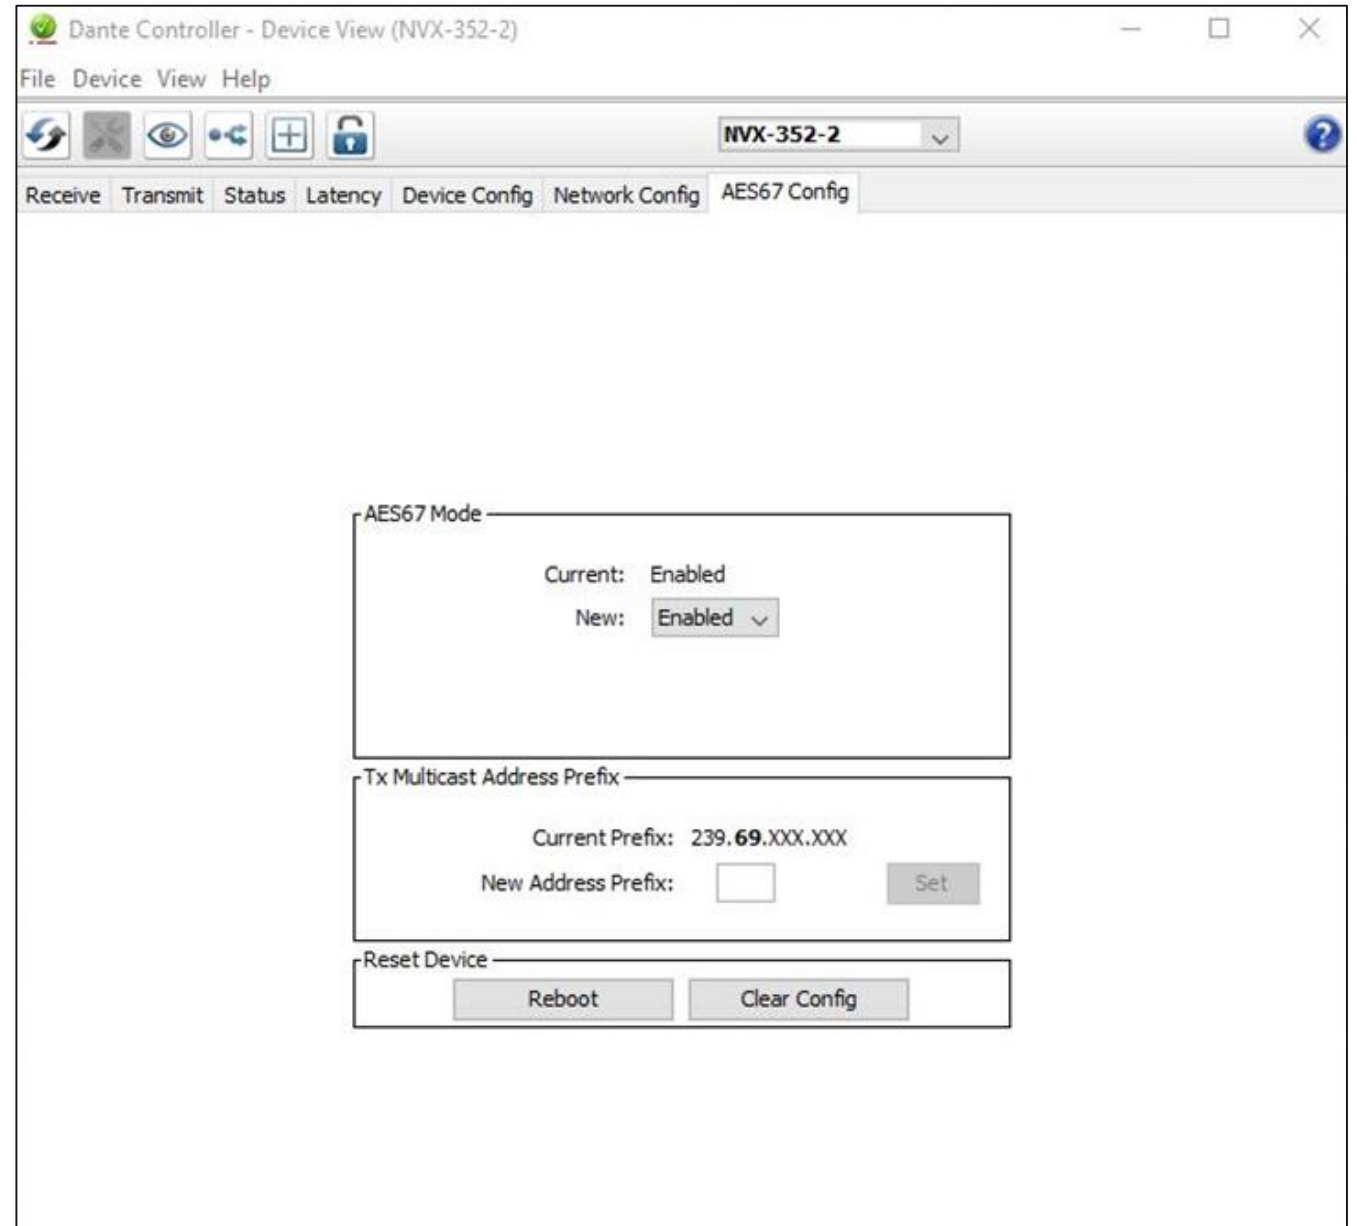

## Firmware Versions:

- Dante: 4.x
- DM NVX™ technology 2.x

The screenshot displays the Dante Control Summary interface. At the top, there are tabs for Routing, Device Info, Clock Status, Network Status, and Events. The Dante logo is prominently displayed. Below the logo, there are two filter input fields: 'Filter Transmitters' and 'Filter Receivers'. The main content area is divided into two sections: 'Dante Transmitters' and 'Dante Receivers'. The 'Dante Receivers' section is expanded, showing a list of receiver devices. Each device entry includes a name, a status icon (a green checkmark or a yellow warning triangle), and a series of small icons representing various device parameters. The 'Dante Transmitters' section is collapsed. The 'Dante Receivers' list includes the following devices: DSP-1281-0eb724, DSP-1283-139400, NVX-352-1, NVX-352-10, NVX-352-11, NVX-352-12, NVX-352-13, NVX-352-14, NVX-352-15, NVX-352-16, NVX-352-17, NVX-352-18, NVX-352-19, NVX-352-2, NVX-352-20, NVX-352-21, NVX-352-22, NVX-352-23, NVX-352-24, NVX-352-25, NVX-352-26, NVX-352-28, NVX-352-29, NVX-352-3, NVX-352-30, NVX-352-31, NVX-352-34, NVX-352-37, NVX-352-38, NVX-352-39, NVX-352-4, NVX-352-40, NVX-352-41, NVX-352-42, NVX-352-43, NVX-352-44, NVX-352-45, NVX-352-46, NVX-352-47, NVX-352-49, NVX-352-5, NVX-352-51, NVX-352-52, NVX-352-53, and NVX-352-54.

# AES-67 Configuration

## Using Dante® Configuration Tool

---

Simple. Scalable. Flexible.  
Affordable. Secure. Yes.

---

**One system that does it all**

**Works with any network**

**Mix and match to your needs  
performance.**

**Infinitely Scalable**

**IT Friendly**

---

**DM NVX**

---

Simple. Scalable. Flexible.  
Affordable. Secure. Yes.

---

**24/7 TrueBlue support**

**Certified switch configurations**

**Online chat Messaging services**

**Free advanced technical support**

**Sales support for:**

- Designing
- Recommendations
- Quoting
- Network Switch Configuration Guides

---

**DM NVX**

# In a world of NO

	NO.	NO.
NO.	NO.	
NO.	NO.	NO.

---

# In a world of NO, DM NVX™ Technology Says YES

---

<b>Y</b>	<b>E</b>	<b>S</b>

---

Every live event synced in real time. On every device. Yes.

---

In the real world. **Yes.** The best sportsbook in Nevada wins with DM NVX™ technology.

“In my opinion, NVX is the future of AV integration.”

Joe Ness, Exec. Director of Entertainment, Electronics and Media

Peppermill Resort Hotel, Reno NV
