"Ok Google, turn on
the kitchen lights"

Unparalleled performance

Crestron is the undisputed leader of home automation. The only company that designs, manufactures and supports every component in your home automation solution, we deliver technology that has been created with you in mind, working together seamlessly to provide the optimum living experience.

By connecting your home through light, temperature, sound and vision, our solutions allow you to take control of your environment, optimizing your home to you. It's about getting the mood right after a long day or knowing you're safe with security you can rely on.

This is true customization and the ultimate user experience.

Technology at the heart of your home

Crestron technology frees you to create an all-in-one bespoke environment, designed specifically for your lifestyle. It's a living space that genuinely gets to know you, and no other brand can offer this level of customization. All of our solutions work as one powerful, efficient system, ensuring a flawless and unique user experience in every space, on every device.

You and your home, speaking the same language

The Crestron and your Google Assistant solution allows complete lighting control throughout your home. Set that perfect scene in any room with the power of your voice. Lighting is just the beginning, the best is yet to come.

Working with the Google Assistant enables Crestron to enhance Google's pioneering home automation technology, providing another incredible Crestron user experience using the power of your voice. It's your space, answering to your needs.

Use the sound of your voice to transform your environment, creating the atmosphere you want, tailored just for you, set the mood for an intimate dinner party or a gentle wake up. All you have to do is ask. Together, our solutions offer customization and personalization that doesn't compare, giving you the freedom to make your home your own.

With Crestron and the Google Assistant, your voice is heard.
