SpaceBuilder GLPAC EXPANSION Program

Version Number: v1.000.003 (initial)

Product or Content Description

SpaceBuilder GLPAC EXPANSION program for GLPAC control systems, for use when more than one GLPAC is used in an application in a master slave configuration, or when DMX is add to a GLPAC.

Notes and Recommendations

Before the program is loaded, the GLPAC should be restored to factory default settings to remove any other program files that may have been previously loaded. Make sure files are archived before restoring, if necessary.

When multiple GLPACS are used in a master/slave application this program will be loaded to any/all slave devices.

In cases where DMX is added to the GLPAC AS part of the system solution this program will be loaded to the GLPAC.

System Requirements and Dependencies

System must comprise of a master/slave configuration, or must be GLPAC with DMX application.
